

Transforming land registry through blockchain application?

Anna Eriksson, CIO and Director of development

**Lantmäteriet – The Swedish mapping, cadastral and land
registration authority**

Land registration at Lantmäteriet

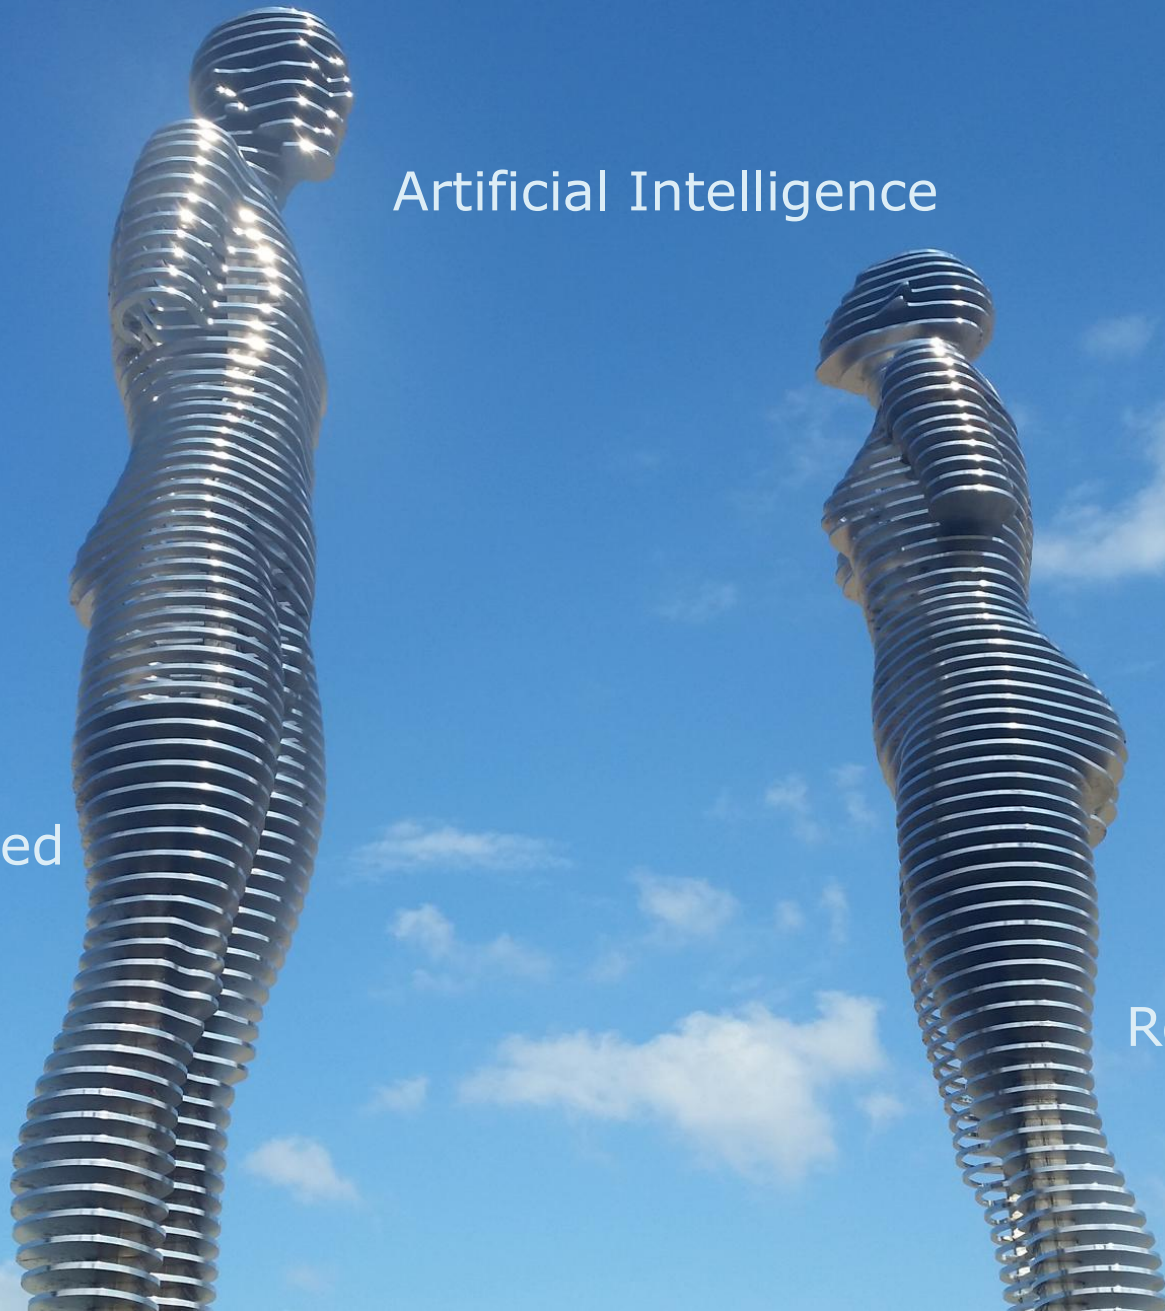

Sweden is divided into more than 3.2 million properties.

Swedish real estate properties are worth three times as much as the national GDP.

Over 1000 new ownership registrations per day.

Each workday Swedish real properties are mortgaged for 1 000 Million SEK (more than EUR 100 Million).

Our projects - innovation

1. Proof of concept
2. Testbed
3. Next phase
 - Type of solution (open, closed, hybrid)
 - Interfaces
 - Governance and operation
 - Legal conditions

To buy a house in the digital world....

An aerial photograph of a small, irregularly shaped island in the middle of a large body of deep blue water. The island features a prominent white lighthouse with a dark top section. Several small, colorful buildings are scattered across the island, along with patches of green grass and some trees. A narrow strip of land connects the island to a larger, more developed area on the left, which includes a parking lot with several vehicles and a small dock with a boat. The water around the island is calm, with some ripples visible.

Thank you!
